

ASX Announcement

ASX Code: OKR

11 August 2020

Quarterly Activities Report Supplementary

Okapi Resources Limited (ASX:“OKR”) (“**Okapi**” & “**Company**”) advises that during the quarter ended 30 June 2020, no exploration activity was conducted in the Company’s Crackerjack Project (E80/4675) and the Mambasa Project in the Democratic Republic of Congo. The Crackerjack Project is located in the southern Halls Creek Mobile Belt, approximately 85 km southwest of Halls Creek, along the eastern edge of the Kimberley Craton in the Kimberley Goldfields of Western Australia. During the quarter COVID-19 related travel restrictions limited the ability of the company to undertake exploration activity on both projects.

As previously advised, the new Board is currently reviewing the current prospects of all the assets held by the Company and will continue to evaluate other project opportunities available in Australia and overseas to enhance the shareholders value. Initially the focus will be on identifying domestic opportunities in precious and base metals.

This release was authorised by Andrew Shearer, Executive Director of Okapi Resources Limited.
